Barley Pellet

A quality supplement designed to optimise pasture, increase intakes and lift production, particularly through the spring.

Performance Pellet

A balanced, quality pellet to support pasture utilisation, increased feed intakes and milk production.

Premium Plus Pellet

A high quality cereal based product with protein sources including Canola and Lupins to suit high producing herds with higher mineral levels and Eskalin.

Energy Plus Pellet

A high grain based pellet with the addition of Maize to enhance premium spring grass, higher energy to aid in joining and higher mineral levels and Eskalin, for high producing cows.

Calf Starter Pellet

High in bypass protein and energy and designed to maximise muscle, bone & rumen development in calves from birth to 3 mths old. Use in combination with milk, water and roughage for a complete daily ration. Offer adlib access limited to 2kg /day to ensure optimal calf growth rates.

Calf Rearer Pellet

High in energy and protein and designed to continue muscle, bone & rumen development in calves 3 to 12 mths old. Offer 2kg/day combined with pasture to ensure optimal heifer growth rates.

High Percentage blend of quality cereal grains which can include: Wheat, Triticale, Barley and Maize.

Combination of legumes and protein sources which can include:

Lupins, Canola Meal, Peas, Pea Pollard, Hominie Meal, By-Products and other protein meals.

Macro minerals delivered in the form of Limestone, Salt, Vitamins, Trace Elements & Bovatec.

Bentonite for buffering.

*Eskalin offered with vet scripts.
